### Please Bring

- Closed toe shoes
- Comfortable clothing
- Clothing for conditions
- Hat, gloves, boots, etc.
- Water bottle
- Lunch

### Program Overview

This eight hour program is look at information and techniques for surviving aviation accidents in cold weather areas. Practice hands on skills ranging from preflight preparation, risk assessment, seat belt usage, crash positions, and responsibilities before and directly after an emergency landing. Training includes discussions and simulation training on journey management, aviation PPE, first-aid skills, and mental and physical requirements for survival.

### Simulator Experience

Students begin training by learning about crash positioning and quickly find themselves practicing these skills in a variety of crash simulators. These simulators include helicopter and fixed wing door escapes, blocked exit procedures, smoke escapes, simulated casualties, patient movement and inversion. Learn what causes crashes and how to increase your chances of survival.

### Post Crash Survival

The field training portion of the course is made specific to the conditions found in both summer and winter in Alaska. Provided with LTR prepared survival kits, students receive hands on experience in rendering wilderness first-aid, moving injured patients, improvising emergency clothing, building fires and even tasting aircraft survival rations. The after-noon ends with the students using a variety of signaling devices including radios, beacons, signal lasers and flares.
